

# Tokeshare Holding International Limited

Tokeshare MarketCap 20 Index (TMC)

## Investment objectives

The Tokeshare MarketCap 20 Index (TMC) is a benchmark designed to measure the performance of the top 20 cryptocurrency projects by market capitalization, as ranked by CoinMarketCaR It excludes stablecoins (i.e. UST), tokens that are pegged to other crypto assets (i.e. WBTC or stETH), and assets with limited investability (e.g. potential litigation risk, or limited circulating liquidity). The index represents the broader cryptocurrency market while providing insight into the performance of a diverse set of digital assets.

## Pricing

The methodology for the Tokeshare MarketCap 20 Index (TMC) is outlined as

Constituent Selection: Includes the top 20 cryptocurrencies ranked on CoinMarketCap, excluding stablecoins and wrapped tokens.

Weighting Method: Market capitalization weighted.

Rebalancing: Conducted monthly at 12:00 AM UTC on the first day of each month.

Currency: Calculations are performed in USD.

Calculation Frequency: Index levels are refreshed every second based on validated CoinMarketCap data sources.

The price of Tokeshare MarketCap 20 Index (TMC) reflects the spot price of CoinMarketCaR 20 Index DTF divided by 10 against the US dollar in real time.

## Creation
